## ACTION/DISCUSSION ITEMS

### A. CONSIDERATION OF JOHN DEERE CERTIFICATE

**BACKGROUND:** Currently, Fort Scott Community College offers the Associate of Applied Science degree in Agriculture Technology-John Deere; there are 21 freshmen and 17 sophomores in the program. Although FSCC produces approximately 20 technicians annually, it is not enough to meet the increasing demand of qualified service technicians requested by John Deere dealerships in the area. Therefore, John Deere faculty is proposing a certificate program in Agriculture Technology-John Deere. The proposed certificate program in John Deere will take three semesters to complete and help meet the demand by graduating more students. The program would be considered certificate C and require 45 credit hours. The curriculum will focus on analyzing, diagnosing and repairing John Deere equipment including engine, power train, electrical, and hydraulic systems through hands on training. Our goal is for the program to initiate in summer 2024 at the current John Deere location.

**RECOMMENDATION:** It is recommended the FSCC Board of Trustees approve the John Deere Certificate as described.

**B. CONSIDERATION OF REVISION TO THE ASSOCIATE OF APPLIED SCIENCE IN  
AGRICULTURE TECHNOLOGY - JOHN DEERE**

**BACKGROUND:** Fort Scott Community College offers the Associate of Applied Science degree in Agriculture Technology- John Deere. The total number of credit hours required for the currently offered degree are 67 including 45 credit hours of John Deere courses, 2 hours of T.I.G welding, and 20 credit hours of general education courses.

The proposed Associate of Applied Science degree in Agriculture Technology consists of 62 credit hours: 45 credit hours of John Deere courses and 17 credit hours of general education courses. It will take four semesters to complete the Associate of Applied Science degree.

**RECOMMENDATION:** It is recommended the FSCC Board of trustees approve the revision to the Associate of Applied Science in Agriculture Technology for John Deere as described.

**C. CONSIDERATION OF HEAVY EQUIPMENT OPERATION PROGRAM**

**BACKGROUND:** During the last few years, business and industry partners have requested a Heavy Equipment operation program due to the increasing demand in the area. The curriculum includes foundational skills of safety, pre- and post-operation checks, site planning and layout, and operations for a range of light-duty and heavy equipment. The certificate program will offer students the opportunity to obtain NCCER (National Center for Construction, Education, and Research) Level I and Level II credentials. The program would be considered a certificate B and require 30 credit hours. The certificate will take one year to complete. The goal is to initiate the Heavy Equipment certificate program in fall 2024 at the Crawford Technical Education Center (CTEC) in Pittsburg and Southeastern Technical Academy for Rural Students (STARS) in Pleasanton.

**RECOMMENDATION:** It is recommended the FSCC Board of Trustees approve the Heavy Equipment Operation Program.

**D. REVIEW AND APPROVAL OF FSCC MISSION, CORE VALUES, AND VISION STATEMENT**

**BACKGROUND:** As the college embarks on preparations for our upcoming Higher Learning Commission Accreditation visit in October of 2025, one of the focuses of the visit will include the college’s mission, core values, and vision statements. Each year, the Board of Trustees will be asked to review and approve the mission, core values, and vision statement. While there are no current changes, anticipated conversations with community members and employees, may constitute revisions. Any revisions will be brought before the Board.

Thank you very much for taking the time to speak to our group from Leadership Landmark. Gordon Parks was a fascinating man and your knowledge of him was so great to hear. The examples of Leadership that Gordon showed at such a young age is something everyone can learn from.
